

_____ABSTRACT OF THE DISCLOSURE

The invention relates to a ~~An~~ automatic ~~screwdriver~~driver device (3) for joining components (2) of a ~~screwing~~driving station (1). ~~Said screwdriver device (3) comprises is~~ provided including a base support (8) that is provided with several automatic ~~screwing~~driving tools (4, 5) ~~which are, the driving tools being~~ mounted thereupon so as to be movable in a multiaxial fashion ~~by means of~~. The movement is via adjusting mechanisms (9, 16, 17, 24, 25). Several of ~~said~~the automatic ~~screwing~~driving tools (4, 5) are combined into at least one screwdriver group and are jointly mounted so as to be movable on the base support (8) by ~~means~~one of anthe adjusting mechanisms (9). One or several ~~screwing~~driving tools (4, 5) can be additionally mounted within the screwdriver group (6, 7) so as to be movable relative to each other ~~by means of~~ at least one other adjusting mechanism (9, 17, 25).
